This presentation is done with Kris Pedretti, a survivor of an attack by Golden State Killer Joseph James DeAngelo. The format is more of a "conversation" between Amy and Kris with Kris telling the story of her attack and her interactions with LE and prosecutors, both immediately following the attack and years later, and Amy talking about how they handled the prosecution and brought justice for Kris and the other Golden State Killer survivors. Amy also presented on DNA basics and using DNA at Trial. The latter was done as a panel discussion with prosecutors from our state, SC. 75	Ortiz, Elizabeth - Executive Director (Arizona Prosecuting Attorneys' Advisory Council) (also Todd Larson - WYDM Institute)	2021	Arizona	"What You Do Matters: Lessons From the Holocaust"	Ethics			Travel expenses for 2 facilitators, \$12/person materials fee, approx. \$500 shippings fee for exhibits	Description: WYDM utilizes the history of Nazi Germany to help prosecutors and law enforcement officers identify their own life lessons for today. The Nazis systematically dehumanized Jews, and through the accompanying incremental change law enforcement shifted from protectors of the people to enforcers of political ideology. One key takeaway of the training is that each of us are personally responsible for our choices – that we cannot simply assign blame to our office’s policies and procedures or to a supervisor who ordered us to take an action. Another key takeaway is the incredibly important role that prosecutors and law enforcement play in our communities – even seemingly small choices can and do have significant impact. The training concludes by having prosecutors and law enforcement articulate both the lessons they learned and also how going forward they will ensure that they do not go down a slippery slope which takes us away from our core mission of doing the right thing – all day every day, in big ways and small.
