5. SUBCOMMITTEE RECOMMENDATIONS AND DISCUSSION OF TOP 5 PRIORITIES

Chair Doñate

New Recommendations

- After the July Prevention Subcommittee meeting, additional recommendations were requested from subcommittee members.
- Due to Open Meeting Law, these could not be included in the initial round of prioritization.
- Five new recommendations were submitted.

New Recommendations Submitted by Prevention Subcommittee Members

New submissions from Debi Nadler

1. Provide appropriate primary prevention education and programming in K-12 schools.
2. Establish a fund within the Department of Health and Human Services (DHHS) to set aside funding for small grants to programs geared toward substance use prevention and education. Grassroots movements in our state who have either suffered a loss and or in recovery. Most knowledgeable and up to date on what is happening and what is working and what is not working.

New Recommendations Submitted by Prevention Subcommittee Members

New submissions from Jessica Johnson

1. Make a recommendation to DHHS to utilize opioid settlement dollars to designate a baseline level of naloxone kits for the next 10 years in Nevada (base this on the state naloxone saturation plan) to create a stable, sustainable source of naloxone throughout the state.
2. Make a recommendation to the legislature to enact legislation to require a general acute care hospital to include a urine drug screening for fentanyl if a person is treated at the hospital and the hospital conducts a urine drug screening to assist in diagnosing the patient's condition.
3. Create a recommendation to the legislature modeled on Maryland's STOP Act which authorizes certain emergency medical services providers to dispense naloxone to individuals who received treatment for a nonfatal drug overdose or were evaluated by a crisis evaluation team, and requires certain community services programs, certain private and public entities, and hospitals to have a protocol to dispense naloxone to certain individuals free of charge under certain circumstances.

Initial Weighted Prioritization

- Prior to the August meeting, Prevention Subcommittee members were asked to prioritize their Top 5 recommendations that had been submitted before the July meeting.
- Four out of the five subcommittee members submitted their prioritizations.
- Weights were determined based on relative priority: 1=50 points, 2=20 points, 3=10 points, 4=5 points, and 5=2 points. Because each weight is multiplied by the rank, with 1 being the highest rank, the descending weights must drop enough to overcome the higher multiplier.
- If multiple subcommittee members ranked the same recommendation, it's highlighted in blue with a corresponding cumulative score.
