Overall, I am satisfied with the quality of this event.	4%	2%	29%	65%
This event achieved all of the stated learning objectives.	4%	0%	33%	64%
Participating in this event increased my knowledge about the training subject.	5%	2%	27%	65%
The content will be useful to me professionally.	4%	4%	35%	58%
This training was provided in a culturally appropriate manner (respectful of individual beliefs, language, perspectives, and needs).	5%	0%	33%	62%
I would recommend this event to others.	7%	0%	31%	62%

### Is there anything you think was missed in the training or that should have been addressed in further detail?

Good training and information

Example of how this applies would have been helpful. The training was not easy to follow. More for legal professionals. Explaining how this can relate to people that are not involved in substance use and help someone that needs assistance.

Perhaps discussion on a strategy to ensure that law enforcement, the DA's office and the judges are all on the same page. It's hard when we try to train people at outreaches because they don't trust that they will really be protected by the Good Sam Law.

No

## **Describe how you will apply this new knowledge to your current practice.**

AS a Social Worker at Welfare we need to be aware of legal aspect of the current law to assist persons with substance use disorders

I am a health educator that regularly trains people about overdose response and in my training I explain the Good Sam law. I feel more confident now that I've been expressing it accurately. Thank you.

Having legal knowledge of these issues is always relevant to a therapy practice.

By utilizing the information provided according to the law

## **What other trainings would you like to see offered?**

statutory rape /Minors.

(When legislative sessions start)I'd like a training on upcoming legislative BDR's related to substance use to keep us in the know about what is happening or being considered at the legislative level.

I'm open to any and all trainings
